

FERRET RACING REGISTRATION

FOR THEIR SAFETY: ALL FERRETS ENTERING MUST BE CD VACCINATED & IN GOOD HEALTH

In line with National Ferret Welfare Society Ferret Show Health and Welfare Guidelines, we ask that you provide information for each ferret you enter.

This is so we can monitor the health of entered ferrets both now and for the following 10 days, during which time potential illnesses might develop.*

PLEASE DO NOT BRING YOUR FERRET TO OUR EVENT IF:

- It is a pregnant or nursing
- It is showing any signs of illness including respiratory distress, diarrhoea, lethargy, green stools/urine, hindlimb weakness, wobbly gait, anorexia, or coughing
- It has had diarrhoea or vomiting within the last 2 weeks
- It currently has respiratory issues such as coughing or sneezing

Ferrets should be well handleable and not susceptible to a stress response from travelling or a busy show environment

All people handling ferrets should be free of respiratory illness such as coughs and colds.
Please use hand sanitiser between handling ferrets from different households.

WE TAKE BIOSECURITY VERY SERIOUSLY **GET IN TOUCH ASAP IF A FERRET FALLS ILL WITHIN IN THE NEXT 10 DAYS**
